

Unique opportunity to join a pre-WCPD 2017 session on international research collaboration!

 Pediatric Dermatology Research Alliance  A pre-WCPD session on paving the way for international research collaboration

13th World Congress of Pediatric Dermatology Chicago, Illinois, USA

A pre-Congress session on Thursday, July 6, 2017, 12:30 - 3:30 pm

There have been worthy efforts around the globe to foster collaborative pediatric dermatology research but a formal international network is not yet a reality. In this pre-Congress session the Pediatric Dermatology Research Alliance (PeDRA), a research network based in the United States, will introduce one successful model for collaborative research.

PeDRA is the organizing entity for 41 multisite studies involving more than 65 institutions. This open session will showcase how PeDRA operates, hot-off-the-press study findings, examples of proven international collaboration, and lessons learned.

Speakers to be announced.

To participate in the PeDRA session, please register for WCPD here:
